**Brochure** 2024

# Unlock Efficiency with MIG CMMS Software

CMMS with Italian Excellence

We'll introduce you to the world of MIG, where we've harnessed technology to simplify and supercharge your maintenance operations.

# Experience the ease of integrating MIG CMMS with your existing business systems

**Empower your organization with a cohesive and optimized workflow.**

MIG Maintenance Software seamlessly integrates with your existing software, offering customizable solutions to optimize data flow and improve communication between systems.

**ERP** (Enterprise Resource Planning)
Connects maintenance with business operations

**CRM** (Customer Relationship Management)
Links maintenance to customer satisfaction

**SCM** (Supply Chain Management)
Manages spare parts and supply chain

**PLM** (Product Lifecycle Management)
Aligns maintenance with product lifecycle

**MES** (Manufacturing Execution System)
Syncs maintenance with production

**PLC** (Programmable Logic Controller)
Automates maintenance tasks

**SCADA** (Supervisory Control And Data Acquisition)
Enables real-time maintenance monitoring

# The main advantages of using MIG as CMMS software:

**Reduction in maintenance costs by up to 30%** through better planning and organization.

**Improved efficiency of maintenance staff by up to 25%** with MIG.

**Extension of asset lifespan by 20-25%** through preventive maintenance and reduced failures.

**Enhanced workplace safety,** lowering maintenance risks by suggesting predefined PPE and equipment.

**Compliance with safety and environmental regulations,** reducing the risk of fines and easing audits.

**Inventory management:** Optimizes stock, reduces costs, and improves tracking and planning.

**Customer satisfaction:** Minimizes equipment downtime through timely and efficient maintenance.

# MIG provides one simplified interface for seamless management across your organization.

## MACHINE MANAGEMENT

Optimize the control of your machines with MIG, ensuring advanced management and efficient maintenance. Integrate existing or new IoT sensors to leverage real-time equipment usage data.

# MIG provides one simplified interface for seamless management across your organization.

## SPARE PARTS WAREHOUSE

Reduce costs and boost maintenance efficiency. Manage consumables and spare parts along with their technical documentation. From procurement tracking to request management, MIG simplifies the process.

## MAINTENANCE PLANS

MIG allows for customizable maintenance plans. Schedule preventive and reactive maintenance activities to ensure your equipment is always operating at peak performance.

# MIG provides one simplified interface for seamless management across your organization.

## REPORT DESIGNER

The report designer enables previews and exports in the most common formats. Visual representation of standardized KPIs is made easy with intuitive graphic elements.

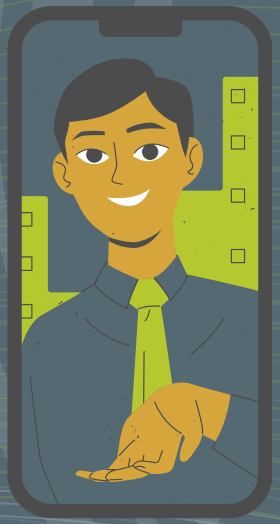
# Immediate start with the benefits of MIG maintenance software

**You can import and create your own machine database, including the majority of records from Excel files.**

Remote training is available.

**Friendly exploration in under 90 minutes, without sales pressure. One of our representatives can show you how MIG has already transformed many companies.**

Your personalized demo.



**Our Certifications**

ISO 9001:2015
21 CFR part 11
ANNEX11

**And our experience** with over 30 years in the industry.

**#MIGperManutenzione**

Suitable for service or manufacturing companies of any size.

# Rely on the quality of our software.

Try MIG and discover how it can simplify your life, whether you're a maintenance technician, manager, supervisor, or director.
